Commission

UNDER THE AUSPICES OF

Regulatory Commission for
Energy of RS

Regulatory Commission for
Energy in FBiH

Security of natural gas supply - a precondition for increasing consumption

Nicolas Kuen

Team Leader – Eastern and Southern Neighbourhood
DG ENER, European Commission

REPower EU

- REPowerEU follows Communication and **toolbox** published in October to respond to soaring energy prices.
- The plan focuses on:
 1. **replenishing** EU gas stocks for next winter;
 2. making Europe **independent** from Russian fossil fuels and **diversify** our gas supplies; and
 3. **transitioning** to renewable gases and accelerating the European Green Deal. As well as scaling up renewables, it will also boost energy efficiency, increase electrification and address infrastructure bottlenecks.

→ Support diversification of energy supplies and phase-out Russian gas imports with special focus on cross-border and regional needs.

Transition from Coal >> N-1 rule

• Southern Gas Interconnection Project **BiH- Croatia**

- Economic and Investment Plan for Western Balkans – Flagship N°5
- Access to LNG terminal KrK (US, Qatar)

→ Reinforce gas SoS in BiH and access to global/EU gas market

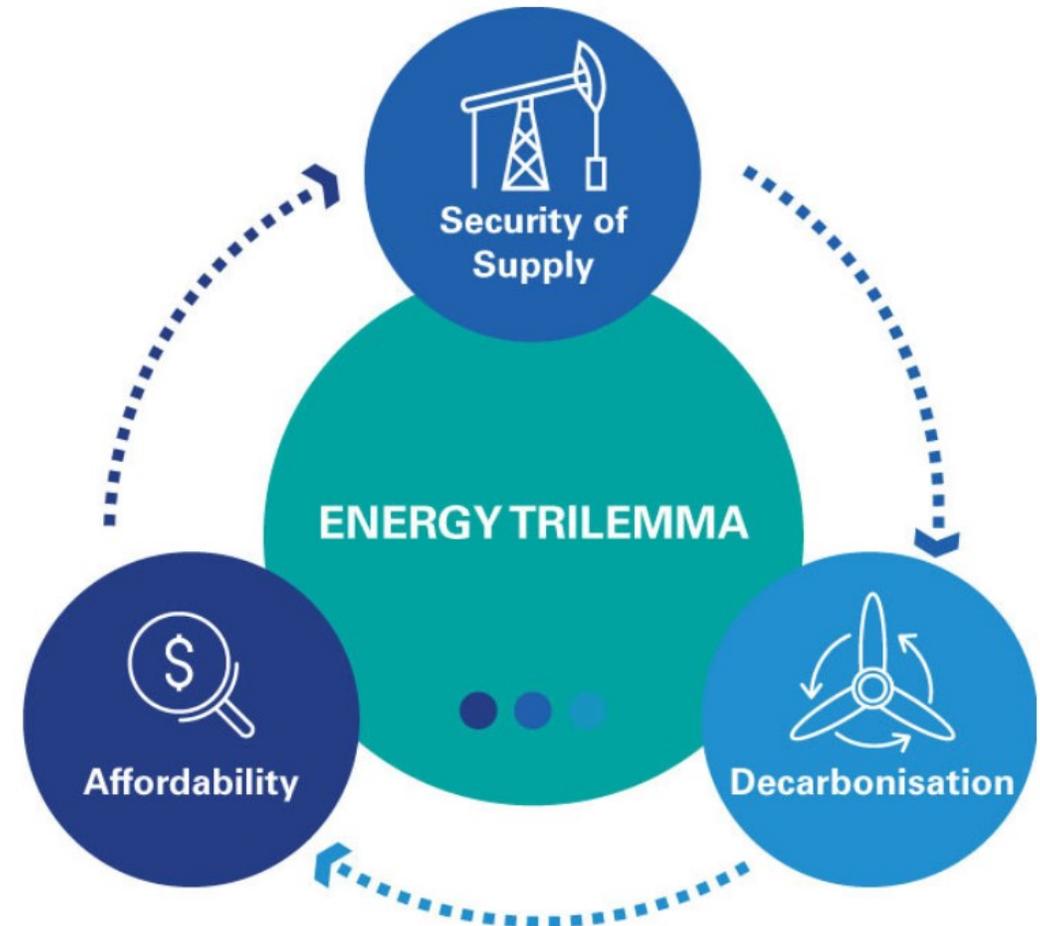

• New Gas Interconnection Project **BiH-Serbia**

- Extension of IBS and IGB (both support by EU and EIB)
- Further access to Turk Stream and other LNG terminals in Turkey

→ Establish regional WB gas market

BiH to speed-up reforms

- Green Agenda for Western Balkans (NECP, CO2 price, CBAM)
- Gas as transition fuel >> back-up RES, reduce pollution and H2 pathway
- Regulatory amendments
 - unbundling, third party access, network codes
 - gas storage (RU = unreliable partner)

Thank you for your attention!
